# Personalized Health and Medication Tuning

Presented by Mohan Kocherla, MS, MS-MIS, MBA,  
Founder and President of Center for DNA Guided Medicine

**September 27, 2018 • 6:30 p.m.**  
**Hop Meadow Country Club**  
**85 Firetown Road, Simsbury**

It seems that nearly everything is being customized today, and healthcare is just now starting to catch up! With the Center for DNA Guided Medicine, the “one-size-fits-all” approach to prescribing medications is advancing to a more personalized method of drug selection. This new, more modern method is based upon the genetic capacity of each individual to metabolize each drug and account for commonly asked questions like:

- **Why don't my medications work?**
- **How come the pill that gives me side effects doesn't give my friend any trouble?**
- **Will my medications work better if I take more or less?**
- **What combinations of pills are the safest for me?**

*Mohan Kocherla*
