

April 21, 2020

Our tireless care teams are aggressively fighting to end COVID-19 on our campus. While our campus might look different, the strength of our mighty caregivers remains constant.

As we manage this virus in our Health Center, we continue to follow the guidelines put forth by local and federal health care agencies on best practices for infection control and continue to educate and train all our staff on recommended care protocols.

Thank you to those who send gifts and flowers to residents, and to families and local businesses for providing delicious meals for our staff, who is working around the clock to care for our community.

We are humbled by the support received from our residents, families and each other.

We remain vigilant, determined, and optimistic.
