

May 29, 2020

It is with happy hearts that we report more recovered patients have moved back to their homes! With this wonderful news comes reenergized efforts to keep up with health and safety practices. We are seeing the results from our hard work!

The CT Department of Public Health visited this morning, with a member of the National Guard, to survey our nursing home. We expect these visits from DPH to continue and rely on their guidance for best practices as they evolve. We received positive feedback from today's survey and have a clear path for continuing on our course.

While we know this fight is not over, we reflect on how far we've come since the beginning of this pandemic. We put health and safety protocols and practices in place quickly, many that were unfamiliar and uncomfortable to us, implemented new communication tools, and adjusted to this "new normal" way of caring for our residents. As we look back, we realize how much we've learned from each other, and grown together as a community. We are all weathering this storm together.

We'd like to take this opportunity to recognize our strength as a community, our sadness for beloved residents we've lost, and express our most sincere gratitude for the support we've received from our residents, families and friends. We could not have come this far without your unwavering support.

We thank you.
