

March 31, 2020

The safety and wellness of our community are always of the utmost importance to us. Now more than ever, we are continuing to focus solely on these priorities, and to support our residents, staff, families and those in the community who rely on us during this challenging time.

The viral outbreak is a fast-changing situation and McLean's leadership team is maintaining regular communications with local and state public health officials and is monitoring guidance provided by the Centers of Disease Control on a daily basis.

Effective March 30th, we have made the decision to temporarily suspend McLean Outpatient Therapy services. If you have any questions, please call 860-658-3745.

We will continue to update this website, social media and family communications when there are changes to our community operations or when new information is available.

As we work to care for our patients and residents, we are in need of Personal Protective Equipment (PPE) and will gratefully accept donations of these specific new and unused items, which includes:

- facemasks
- cone style facemasks
- protective goggles
- vinyl gloves (medium and large)
- respiratory masks
- face shields
- facemasks with shields
- N95 Respirator NIOSH mask
- gowns
- large plastic 3-drawer bins

Please call Vickie Dirienzo at 860-658-3702 or Vickie.Dirienzo@McLeanCare.org if you have any questions or have any of these items available to donate.

We are thankful and so appreciative of your support and understanding.
