## Website Update

We are posting this update as we continue to fight COVID-19 in our Health Center. We remain steadfast in our relentless efforts.

The CT Department of Public Health has been visiting nursing homes across our state to conduct their interim survey focused on infection control processes related to COVID-19. The surveyor visited McLean last week and was very complimentary during their tour. We are buoyed by a positive survey as we continue to strictly follow best practices for infection control and sanitizing efforts to reduce the spread of this virus.

As a community, we are very fortunate. We would like to take this opportunity to extend our gratitude.

We are so grateful for the steady leadership of our team as we implement ever-changing recommendations; for the unwavering strength and dedication of our front line staff as they care for our community; for our patients and residents who make our work so very meaningful. And especially for our families, for trusting us to care for their loved ones while they remain at a distance and for supporting us through this incredibly challenging time.

We don't know how long this challenging time will last, but we do know that through cooperative efforts and sheer determination, we will get through it together.
