

April 3, 2021

Dear Residents, Patients and Families,

We are sending an update today to let you know of one employee from Evergreen Way who has tested positive for COVID-19 as a result of our surveillance testing. They are currently isolating at home. Contact tracing is complete and anyone who was potentially exposed will be individually notified by our staff.

All rapid antigen test results of residents and day staff are in and are all negative. We will continue antigen testing of evening and night staff and resume weekly testing of staff and residents and let you know of any positive results. Visitation is restricted to compassionate care visits only at this time (significant change or end of life). We have stopped group activities until we have outbreak surveillance testing results. Hairdressing is also on hold.

Thank you for your support as we continue to work diligently to care and protect our community. If you have any questions, please do not hesitate to reach out to us directly. Please find our cumulative data below.

David Bordonaro  
President

Lisa Clark  
Vice President, Administrator of the Health Center

**Cumulative data** below is from March 2020 to April 3, 2021
